## **DETAILED ACTION**

### ***Election/Restriction***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-17, drawn to a white pozzolan and a cement composition comprising the pozzolan, classified in class 106, subclass 716.
  2. II. Claims 18-24, drawn to a process for converting glass fiber wastes into high quality filler and pozzolan products, classified in class 241, subclass 24.3.
3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation and functions. Note that there is no requirement in the independent claims found in Group I that the glass utilized be derived from a specific process (i.e. that the glass be shredded into short fibers, its moisture adjusted, followed by grinding and then classification). Note that independent claim 1 requires that the glass be a low alkali, low iron calcium aluminosilicate glass, independent claims 11 and 13 require that any finely ground vitreous low alkali low iron glass derived from glass manufacturing by-products be utilized, and that independent claim 14 requires a glass derived from fine grinding of glass fibers

Art Unit: 1755

whereas the process of independent claim 18 (Group II) requires specific steps (i.e. shredding of glass fiber wastes into fibers, adjustment of moisture content, grinding, and the classification).

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. A telephone call was made to Stefan Klauber on 07 May 2003 to request an oral election to the above restriction requirement, but did not result in an election being made. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anthony Green whose telephone number is (703) 308-3819. The examiner can normally be reached on Monday - Thursday and alternate Fridays from 6:30 AM to 4:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Bell, can be reached on (703) 308-3823. The fax phone numbers for the Group are as follows:

- (i) (703) 872-9310 for any non-final amendment or communication, and
- (ii) (703) 872-9311 for any after-final amendment or communication.

Art Unit: 1755

It is suggested that the examiner be notified that a fax has been sent to ensure prompt handling of the amendment or communication.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the Group receptionist whose telephone number is (703) 308-0661.
